TELECOMMUNICATIONS AND NETWORKS

Corferias **offers Internet** services that have a shared bandwidth and allows unlimited browsing without restrictions. Corferias delivers a PIN (password) as a valid authentication system for each computer. This PIN can only be transferred to other computers or devices after a timeout of 12 hours and does not allow simultaneous connections. When this service is requested, the amount of devices that will be connected must be specified in the **"AMOUNT OF DEVICES"** field. The **"NUMBER OF DAYS"** section must only be filled out if the **"DAILY VALUE BY EQUIPMENT** option is selected.

OPTIONS

- **Wired:** Applies to desktops and devices with a RJ45 network card. This service allows for billing, remote desktop connection, video conference, VPN and streaming.
- **WiFi:** Applies to tablets and laptops (*read Wi-Fi Terms of Use). This service allows for browsing, checking emails and all services applicable to these devices

Does not include: public IP address (see code 3071422/3071421), switches (see code 3071407), additional connections to those described in this form, configuration of routers or access points.

WIFI TERMS OF USE

Due to its wireless nature, the **WIFI** service may have intermittent connection caused by the multiple frequencies irradiated and the radio electric spectrum saturation generated by the interference of devices of the different participants in the event or trade fair. Thus, if Exhibitors require WIFI as a **Corporate and Specialized Solution**, the Technology Department must be informed in order to conduct the respective studies and validations of the service and make any adaptations or tuning.
